Roanoke Valley-Alleghany Region

OVERVIEW

The annual Comprehensive Work Program is the basis for achieving the objectives and strategies outlined in the Roanoke Valley-Alleghany Regional Commission's Strategic Plan. The Commission strives to maximize its limited staff and resources by developing a comprehensive work plan based on current needs and priorities of the region.

This Work Program is a compilation of projects presented by Commission members, Chief Administrative Officials, regional economic development-related organizations, and Commission staff. Projects are reviewed and ranked according to importance, funding availability, staff time and other constraints. The intent is to obtain the most benefit from the least direct cost to the local governments. Requests not included in this year's work program are added to a list of potential projects for future work programs. These potential projects may be included in next year's work program if the need still exists and funding is available.

To meet State and Federal requirements several program areas are required to have specially formatted work programs which are also submitted and approved separately from the RVARC work program. In most instances, these programs have already been approved by the time the RVARC adopts this work program document. These programs include, the Roanoke Valley Transportation Planning Organization Unified Planning Work Program, Rural Transportation Work Program, and the RIDE Solutions Work Program. These work programs are separate documents and their projects are not included in this work program document.

The work program is revised annually and may be amended as deemed necessary by the member governments that we serve.
